

Your views on a planned Gypsy/Traveller stopping site in Perth

Tell us what you think of the design plan

November 2024

Perth and Kinross Council is developing plans for a dedicated stopping site for the Gypsy/Traveller Community near the Food & Drink Park in North Muirton, Perth.

We would like to hear from members of the Gypsy/Traveller Community what you think about the design of the planned site. This area has been chosen because it has been a preferred stopping site for Gypsy/Travellers for many years, and has historical significance to the community.

The plan for a transient stopping site with access to dedicated utilities and amenities will allow the Gypsy/Traveller community to stop in the area, and avoid the necessity to set up unauthorised camps on land near local businesses.

We have now developed a design for the plan, along with some artists' impressions of how it will look, which you can find with this newsletter.

You are invited to complete an online consultation to provide us with your feedback and views on the design. This can be found at:

<https://shout.com/s/PerthGTsite>

You can scan this QR code with your phone's camera app to be taken to the consultation:

We are only consulting about the design of the site at this point. We will consult you in the near future about how the site will operate - for example, the length of time that people will be permitted to stay.

We expect the site to be completed by 2026.

What will be on the site?

Amenities and facilities in the design include:

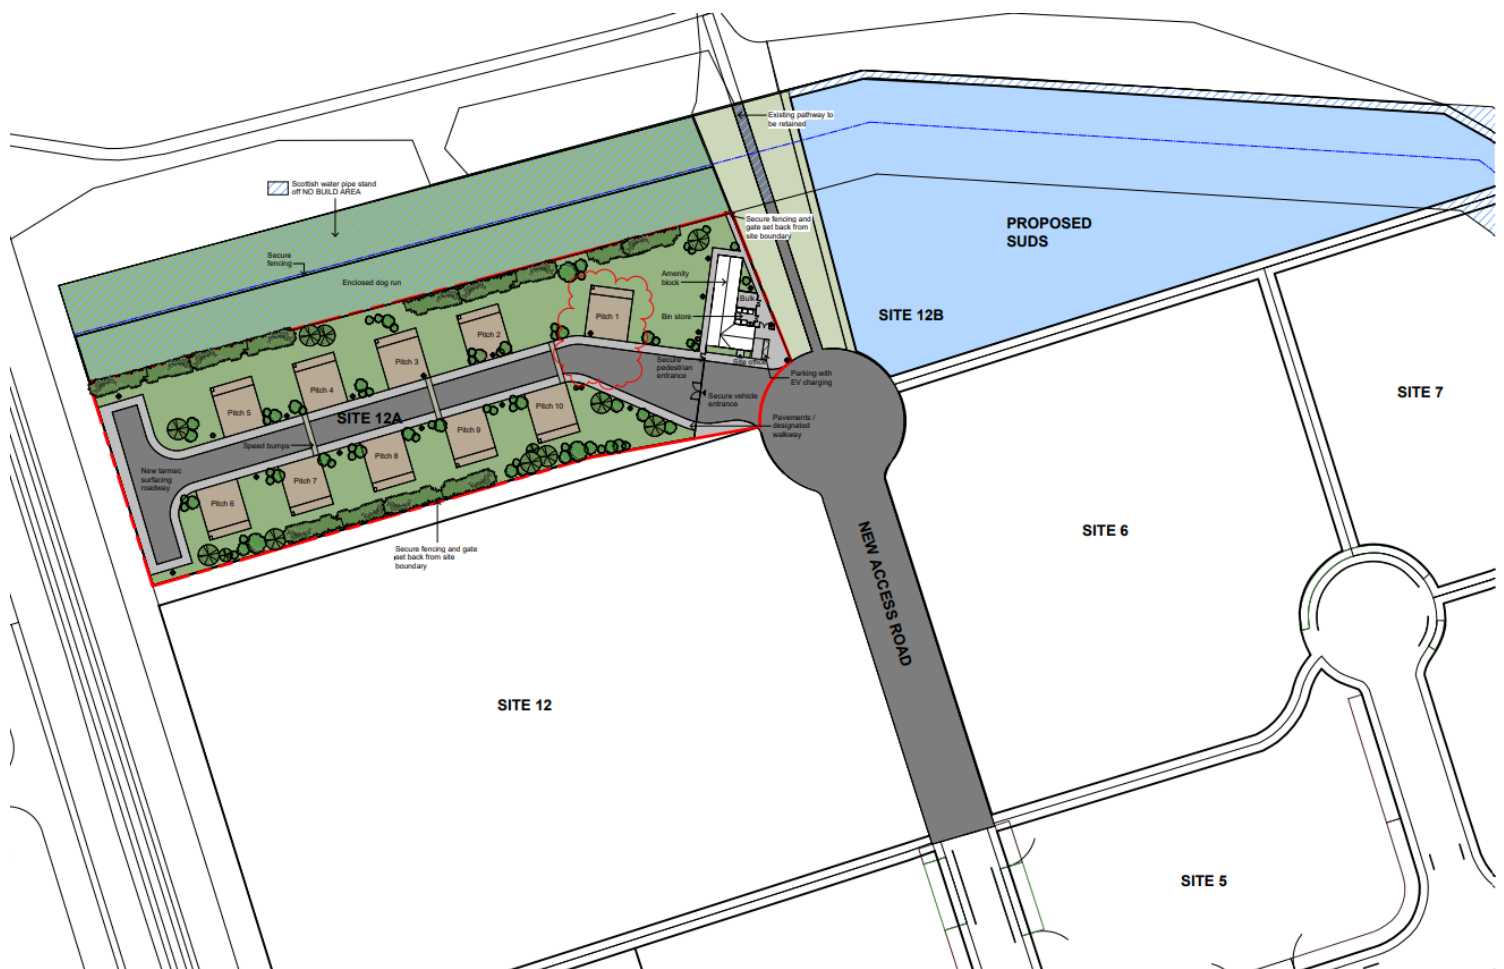

- 10 caravan pitches with individual access to utilities, including electricity and a waste bin
- A permanent Council office where officers will be regularly available to discuss any business issues.
- Secure fencing, and secure vehicle and pedestrian entrances
- An amenity block with separate male and female shower and toilet blocks (with accessible showers and WCs)
- Washing facilities
- A bin store area for the easy disposal of domestic waste, as well as an area where bulk waste can be disposed of for pick-up
- Green landscaping with vegetation screening around the site and the individual caravan pitches for privacy
- A dog run area for exercising pets
- A community seating area
- Parking with an EV charging point
